

Introduction

Military robots are autonomous robots or remote-controlled mobile robots designed for military applications, from transport to search & rescue and attack.

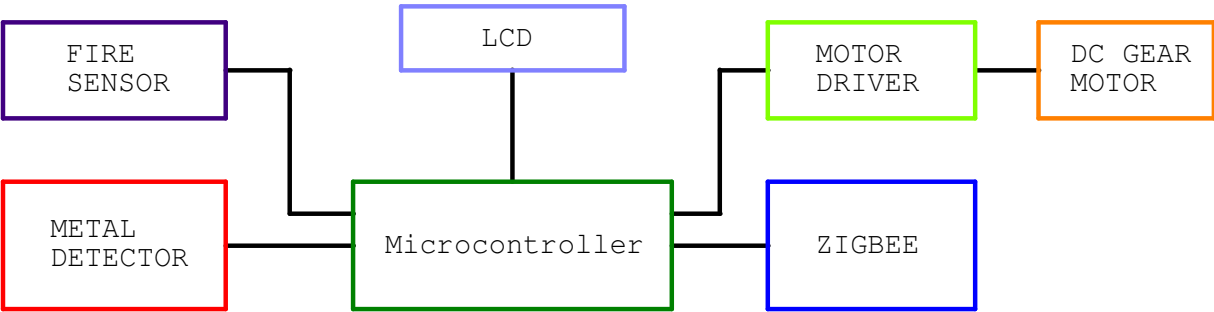

Some such systems are currently in use, and many are under development.

Autonomous robotics would save and preserve soldiers lives by removing serving soldiers, who might otherwise be killed.

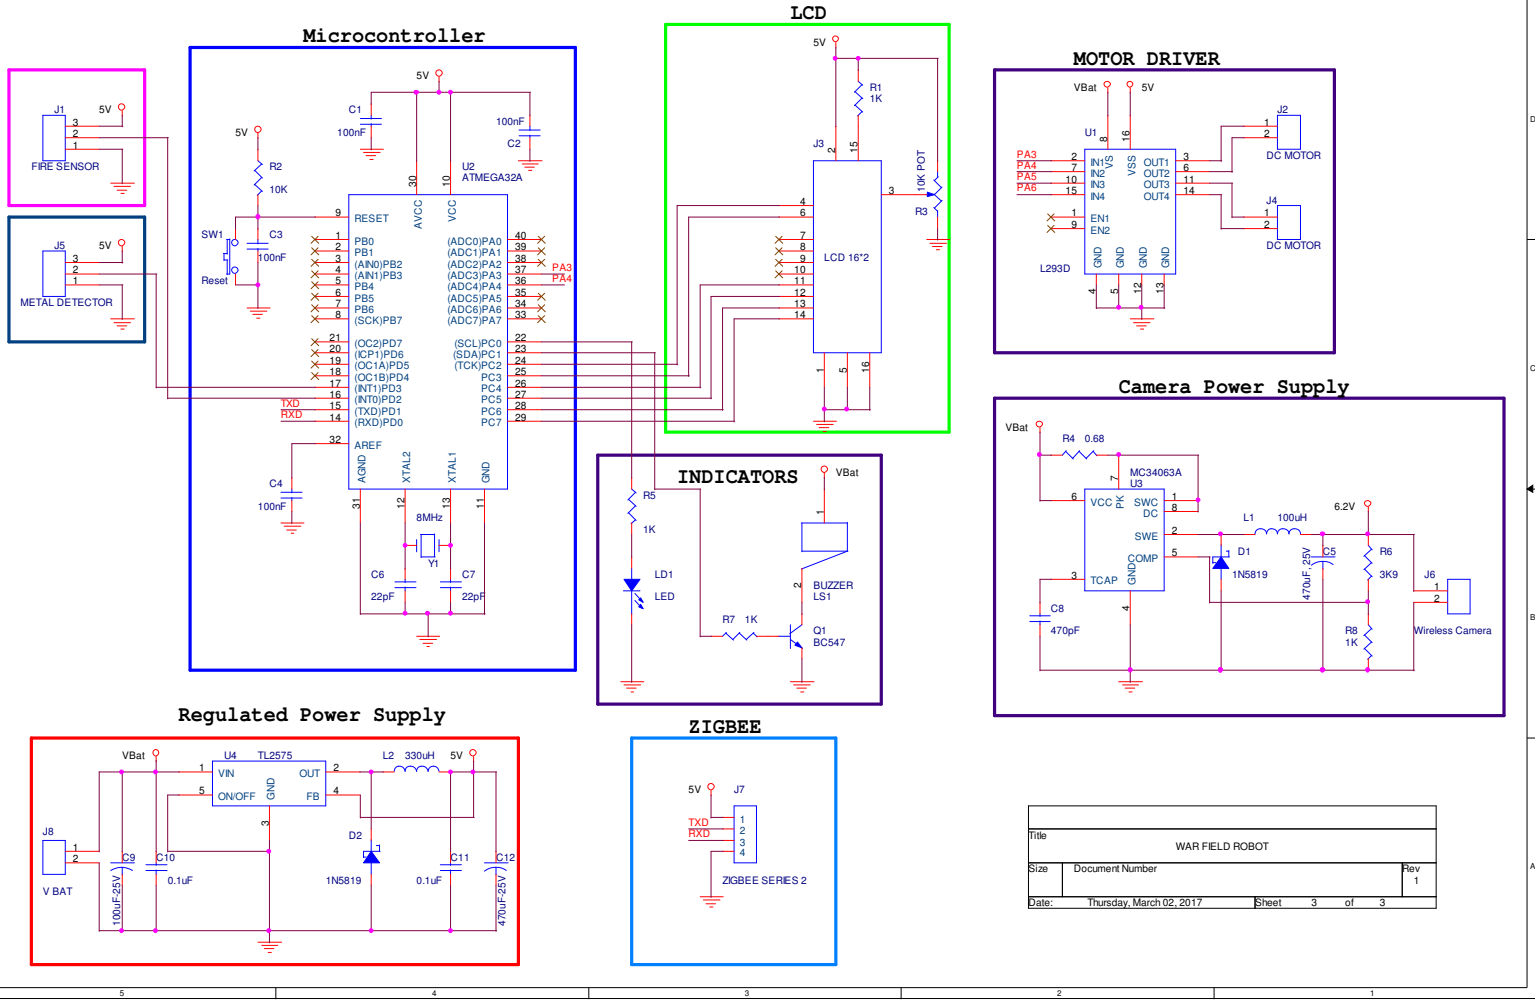

Let's design our own War Filed Robot with Night Vision Camera.

Title		WAR FIELD ROBOT	
Size	Document Number		Rev 1
Date:	Thursday, March 02, 2017		Sheet 1 of 3

FUNCTIONAL BLOCK DIAGRAM
